

OBJECTS NEEDED TO DRAFT PERSPECTIVE PROJECTIONS

Plan view

Elevation view to the same scale.

STARTING A PERSPECTIVE PROJECTION

A PLAN VIEW

- 1 Choose the angle of the view (right, centred or left). This will set the angle of the plan viewed by the observer.
- 2 Draw the plan at an angle that suits the desired angle of view.
- 3 Draw the Eye (E) point about 18 metres (at scale 1:100) from the front corner of the plan.
