

7. DRAWING SETUP GUIDE

STEPS TO START A DRAWING

1. HOW BIG IS THE PROJECT?

Add up the individual dimensions of the walls and spaces to get the OVERALL DIMENSION both length and breadth. We are working on the PLAN here.

2. SELECT THE REQUIRED SCALE

In the case of the "Bathing Space Project" the scale will be 1 : 20.

Look at this scale and see how long each of the overall dimensions will be at 1 : 20.

3. LOCATE THE DRAWING ON THE SHEET

To LOCATE the proposed drawing on the paper by eye, grab your scale rule in both hands and place your left index finger on the "0" end with your right index finger at the correct scaled length (whatever that may be, varying for each project). move your scale with hands clamped on it around the sheet to find the best place to put a drawing this size....then draw a light line mark at the left finger location.....this is where the left hand end of the drawing will start.
