

For CARDBOARD CHAIRS, The technique is similar to tall cupboards but use a long strip of card with scored lines where folds are required. Fold and glue, holding the unit until the glue sets so fast-acting glue is needed here.

For LOUNGE-TYPE CHAIRS, foamcore is used for the various sections/pieces of the chairs. For longer lounges, light pencil/pen lines are OK to indicate cushions otherwise the unit can look like a bench instead.

AFTER FOLDING GLUE ON BACK OR UNDERIDE OF FOLDS.

KEEP HOUD OF CHAIR WHHUE GLUE SETS.
